

## Resources for Lake Information in Maine

Websites: <http://lakesofmaine.org/> has information/data that you can look up by lake/pond name.

<http://www.state.me.us/dep/blwq/lake.htm> from the Maine Department of Environmental Protection is also useful, and includes information about lake resources, monitoring, etc.

<http://www.mainevlmp.org/wp/> is the website of the Maine Volunteer Lake Monitoring Program (VLMP), the oldest citizen monitoring program in the country. The VLMP also houses the Maine Center for Invasive Aquatic Plants. These organizations have regular trainings that I recommend!

<http://www.umaine.edu/waterquality/> is our own home page for water quality. There is a blog (please follow it) and a link to our UMaineWater twitter feed. We try to post timely information about water, including Maine lakes.

Other organizations include your Soil and Water Conservation Districts (<http://maineswcds.org/>), Maine Congress of Lake Associations (which has more of an advocacy role, but still has a lot of educational information) (<http://www.mainecola.org/>), and of course, your lake association!
